

**Management's Discussion and Analysis of Financial Condition and Results
of Operations for the three months ended June 30 and March 31, 2015 and six months
ended June 30, 2014 and 2015**

Definitions and Conversions

The following discussion is intended to assist you in understanding the Group financial position as of June 30, 2015 and results of operations for the three months ended June 30 and March 31, 2015 and six months ended June 30 2015 and 2014 and should be read in conjunction with the Interim Condensed Consolidated Financial Statements and notes thereto, which were prepared in accordance with International Financial Reporting Standards ("IFRS").

This report represents Group's financial condition and results of operations on a consolidated basis. In this report the terms "Gazprom neft", "Company", "Group" represent JSC Gazprom neft, its consolidated subsidiaries and proportionally consolidated entities (Joint operations as defined in IFRS 11) ("Tomskneft", "Salym petroleum development" (SPD) and Yuzhno-Priobskiy GPZ). The term "Joint ventures" represents entities accounted for by the equity method.

Tonnes of crude oil produced are translated into barrels using conversion rates reflecting oil density from each of our oil fields. Crude oil purchased as well as other operational indicators expressed in barrels are translated from tonnes using a conversion rate of 7.33 barrels per tonne. Translations of cubic meters to cubic feet are made at the rate of 35.31 cubic feet per cubic meter. Translations of barrels of crude oil into barrels of oil equivalent ("boe") are made at the rate of 1 barrel per boe and of cubic feet into boe at the rate of 6,000 cubic feet per boe.

Forward-Looking Statements

This discussion contains forward-looking statements concerning the financial condition, results of operations and businesses of Gazprom neft and its consolidated subsidiaries. All statements other than statements of historical fact are, or may be deemed to be, forward-looking statements. Forward-looking statements are statements of future expectations that are based on management's current expectations and assumptions and involve known and unknown risks and uncertainties that could cause actual results, performance, or events to differ materially from those expressed or implied in these statements.

Forward-looking statements include, among other things, statements concerning the potential exposure of Gazprom neft to market risks and statements expressing management's expectations, beliefs, estimates, forecasts, projections and assumptions. These forward-looking statements are identified by their use of terms and phrases such as "anticipate", "believe", "could", "estimate", "expect", "intend", "may", "plan", "objectives", "outlook", "probably", "project", "will", "seek", "target", "risks", "goals", "should" and similar terms and phrases. There are a number of factors that could affect the future operations of Gazprom neft and could cause those results to differ materially from those expressed in the forward-looking statements contained in this Report, inclusively (without limitation): (a) price fluctuations in crude oil and gas; (b) changes in demand for the Company's products; (c) currency fluctuations; (d) drilling and production results; (e) reserve estimates; (f) loss of market and industry competition; (g) environmental and physical risks; (h) risks associated with the identification of suitable potential acquisition properties and targets, and successful negotiation and completion of such transactions; (i) economic and financial market conditions in various countries and regions; (j) political risks, project delay or advancement, approvals, and cost estimates; and (k) changes in trading conditions.

¹ Sales includes export duties and sales related excise tax

² EBITDA is a non-IFRS measure. A reconciliation of adjusted EBITDA to profit before income taxes is provided in the appendix

³ Translated to USD at the average exchange rate for the period

6m 2015 Highlights

- In March obtained control over Gazprom Resource Northgas LLC, which holds 50% of Northgas CJSC, increasing share in Northgas from 9.1% to 50%
- Began production from Yaro-Yakhinskoye, third SeverEnergiya (Arcticgas) oilfield
- In April received first shipment of Kirkuk oil in compensation for expenses at Badra
- Awarded exploration and production licenses for Maloyuganskiy, Zapadno-Zimniy, Panlorskiy 5 and Nyalinskiy areas
- China's largest independent rating credit agency, Dagong Global Credit Rating Company Limited, awarded Gazprom neft a strong long term credit rating for liabilities denominated in Russian rubles: AA with stable outlook.

Results for 6m 2015 compared with 6m 2014

- Total hydrocarbon production including our share in joint ventures increased 19.4% to 38.01 MMtonnes on continued production growth at Orenburg region fields and SeverEnergiya (Arcticgas), startup of Prirazlomnoye, increasing Northgas share to 50%
- The Group optimized crude processing volumes relative to oil and oil products prices and demand conditions. Total refining throughput declined 3.1%, while output of light products remained unchanged from 2014. Reforming plant repairs at Moscow refinery in June 2015 negatively affected throughput
- Lower oil and oil products prices on international market resulted in 1.4% decrease in sales
- Increased hydrocarbon production and sales through premium channels, management actions to offset negative effects of tax manoeuvre effective January 2015, and negative export duty lag resulted in 12% increase in adjusted EBITDA
- Larger increase in profit attributable to Gazprom neft (28.3%) vs. EBITDA (12%) resulted from positive impact of revaluing non-ruble debt at current foreign exchange rates.

Results for 2Q 2015 compared with 1Q 2015

- Daily hydrocarbon production including our share in joint ventures increased to 1.61 MMboepd
- Total hydrocarbon production including our share in joint ventures increased 8.7% (in boe) due to startup of gas processing complex at Yaro-Yakhinskoye field in April 2015, and increasing Northgas share to 50%
- Refining throughput increased 5.2% due to more efficient operations at Moscow and Omsk refineries
- Revenue increased by 17.9% as Group increased its market share and realized higher prices on domestic oil products market.
- Increased hydrocarbon production, positive export duty lag effect, and management actions resulted in 13.9% increase in adjusted EBITDA
- Net profit attributable to Gazprom neft was RUB 73 billion compared to RUB 39 billion in 1Q 2015. Profit attributable to Gazprom neft was positively affected by revaluation of non-ruble debt at current foreign exchange rates and writing off Company's RUB 16.1 billion share in liability at JSC Tomskneft.

Operational Data and Analysis

Production Drilling

2Q 2015	1Q 2015	Δ, %		6m		
				2015	2014	Δ, %
Consolidated subsidiaries						
804	650	23.8	Production drilling ('000 meters)	1,454	1,489	(2.4)
200	186	7.5	New production wells	386	397	(2.8)
34.14	36.31	(6.0)	Average new well flow (tonnes per day)	35.22	40.18	(12.4)
Proportionally consolidated companies						
226	168	34.5	Production drilling ('000 meters)	394	287	37.1
52	49	6.1	New production wells	101	79	27.9
Joint ventures						
311	261	18.8	Production drilling ('000 meters)	572	514	11.3
64	45	42.2	New production wells	109	92	18.5

- Production drilling increased Q-o-Q due to:
 - Reduced drilling activity in 1Q 2015 due to poor weather conditions
 - Increased drilling at Novoport and planned drilling increases in Noyabrsk region in 2Q 2015
 - Drilling at self-contained fields at Messoyakha project.
- Production drilling by consolidated subsidiaries decreased 2.4% Y-o-Y due to greater share of horizontal wells which are drilled more slowly than deviated wells.

146.92	135.14	8.7	MMboe	282.06	234.18	20.5
1.61	1.50	7.3	Daily hydrocarbon production (MMboepd)	1.56	1.29	20.9

* Production volume includes marketable gas and gas utilized in Company power plants

** Production for Archinskoye and Urmanskoye fields is presented in Gazpromneft – Vostok effective 1 June 2015 due merger of LLC Archinskoye into Gazpromneft-Vostok in June 2015

- Daily hydrocarbon production in tonnes of oil equivalent increased 20.9% Y-o-Y and 7.3% Q-o-Q
- Group oil production increased 7.2% Y-o-Y to 27.18 MMtoe, driven by increased production at SeverEnergiya (Arcticgas), startups at Prirazlomnoye and Iraq, continued growth at Orenburg region fields, and higher share of Northgas

- Group natural gas production increased 67.3% Y-o-Y and 22.4% Q-o-Q primarily as a result of higher production at Urengoykoye field, startup at Yaro-Yakhinskoye field (SeverEnergiya (Arcticgas)) and higher share of Northgas.

Crude Oil Purchases

2Q	1Q			6m		
2015	2015	Δ, %	(MMtonnes)	2015	2014	Δ, %
2.16	1.37	57.7	Crude oil purchases in Russia *	3.53	1.97	79.2
-	-	-	Crude oil purchases internationally	-	1.07	-
2.16	1.37	57.7	Total crude purchased	3.53	3.04	16.1

* Crude oil purchases in Russia exclude purchases from the Group's joint ventures Slavneft and SeverEnergiya

- Crude oil purchases in Russia increased 57.7% Q-o-Q and 79.2% Y-o-Y due to more effective domestic trading operations.

Refining

2Q	1Q			6m

0.09	0.10	(10.0)	Lubricants	0.19	0.17	13.8
0.76	0.64	18.8	Other	1.40	1.27	10.6
10.44	9.92	5.2	Total production	20.36	21.04	(3.2)

- Total throughput declined 3.1% Y-o-Y due to repairs at Moscow reforming plant in June 2015 and planned repairs to hydrocracking plant at Yaroslavl in April 2015. The Group optimized refining throughput relative to oil and oil products price and demand conditions. Total light products output changed little from 2014; the most significant production decrease was in fuel oil (-15.8%)
- Refining throughput increased 5.2% Q-o-Q due to efficiency improvements at Moscow and Omsk refineries
- Increased bunker fuel production 2.7% Y-o-Y and 25.0% Y-o-Y in response to higher market demand for low-friction type E bunker fuel, with corresponding reductions in diesel and fuel oil production
- Diesel production decreased 6.2% Y-o-Y due to hydrocleaning plant repairs in May-June 2015 and increase in bunker oil production

- Jet fuel production increased 31.8% Y-o-Y and bitumen production increased 236.8% Y-o-Y due to seasonal factors
- Gasoline production decreased 1.7% Q-o-Q due to reduced production at Yaroslavl as a result of repairs to hydrocracking plant in April 2015.

Total	31,643	1.15	31,762	1.13	(0.4)	1.8

- Domestic jet fuel purchases decreased Y-o-Y due to lower consumption and discontinuing exports to Kyrgyzstan
- Domestic jet fuel purchases increased Q-o-Q due to seasonal demand
- Domestic bunker fuel purchases increased Q-o-Q due to purchases of ultra-low sulfur fuel oil ULS FO connected with adoption of MARPOL standards in the Baltic Sea resulting in increased demand.

Products Marketing

2Q 2015	1Q 2015	Δ, %		6m 2015	6m 2014	Δ, %
	(units)		Active retail stations		(units)	
1,161	1,156	0.4	In Russia	1,161	1,086	6.9
249	249	-	In CIS	249	232	7.3
422	420	0.4	In Eastern Europe	422	416	1.4
1,832	1,825	0.4	Total retail stations (as at the end of the period)	1,832	1,734	5.6
18.7	17.8	4.8	Average daily sales per retail site in Russia (tonnes per day)	18.3	18.7	(2.2)
	(MMtonnes)		Sales volume through premium channels		(MMtonnes)	
4.74	4.11	15.3	Gasoline and Diesel	8.85	8.78	0.8
0.80	0.62	29.0	Jet	1.42	1.39	2.2

0.06	0.05	20.0	Lubricants	0.11	0.09	22.2
6.62	5.70	16.1	Total sales volume through premium channels	12.32	12.20	1.0

- Total number of active retail stations increased 5.6% Y-o-Y
- Average daily sales per retail site in Russia decreased 2.2% Y-o-Y due to decline in consumption of premium diesel in Company's market area
- Q-o-Q 4.8% increase in average daily sales per retail site in Russia due to seasonal factors
- Sales volume through premium channels increased 1.0% Y-o-Y as:

- Management actions increased market share in all premium channels under conditions of weakening demand
- Jet fuel sales increased due to expanded sales network within and outside Russia, including Russian military airports and 100% ownership of Gazpromneft-Aero Sheremetyevo since March 2014;
- Bunkering sales remained essentially unchanged as higher market share in Far East and Black Sea markets offset impact of weaker total market demand
- Sales volumes through premium channels increased 16.1% Q-o-Q primarily due to seasonal demand
- Lubricants production increased 22.2% Y-o-Y due to full-period operation of the Omsk lubricants plant (Russia's largest) in 2015 compared to operation since April startup in 2014.

26,455	25,545	3.6	Domestic sales	26,036	25,405	2.5

Crude Oil Sales

- Crude export volumes decreased 6.3% Y-o-Y due to a shift to domestic sales at improved market prices
- Crude export volumes increased 22.5% Q-o-Q due to timing of crude sales from Arctic fields (Prirazlomnoye and Novoport)
- Crude export volumes to CIS increased 94.6% Y-o-Y due to beginning exports to Uzbekistan
- Domestic crude volumes increased 91.7% Y-o-Y due to more effective domestic trading operations.

Gas sales

- Domestic gas sales increased 28.1% Q-o-Q and 15.2% Y-o-Y due to increased production and purchases at SeverEnergiya (Arcticgas) and Northgas.

- Total petroleum products export volumes declined 8% Q-o-Q due to increase in petroleum products sales to domestic market
- Total petroleum products export volumes declined 24.8% Y-o-Y due to lower international transactions based on purchased petroleum products
- Increased bunker fuel exports and reduced fuel oil exports Y-o-Y due to product mix changes at Omsk refinery.

Total	346,273	13.30	339,416	13.36	2.0	(0.4)

- Domestic jet fuel volumes increased 27.1% Q-o-Q due to seasonal factors and expansion of airport network in Russia, including cooperation with military airports
- Bunker fuel and bitumen sales volumes increased due to seasonal factors
- Domestic jet fuel volumes decreased 10.7% Y-o-Y due to market conditions.

Other Revenue

Other revenue primarily includes revenue from transport, construction, and other services.

- Other revenue increased 63.3% Y-o-Y primarily due to an increase in operating services provided by the Group to Messoyakha.

Purchases of Oil, Gas and Petroleum Products

- Purchases of oil, gas, and petroleum products declined 10.9% Y-o-Y due to oil price decline
- Purchases of oil, gas, and petroleum products increased 57.1% Q-o-Q due to increased crude oil purchase volumes.

** PSA refers to production sharing agreement

- Upstream expenses include expenditures for raw materials and supplies, maintenance and repairs of producing equipment, labor costs, fuel and electricity costs, activities to enhance oil recovery, and other similar costs at our Upstream subsidiaries.
- Upstream expenses at consolidated subsidiaries in Russia increased 17.5% Y-o-Y due to including Prirazlomnoye field in consolidation and expanded activities to increase yields
- Upstream expenses per toe at Brownfields increased 7.9% Y-o-Y due to:
 - Increase in workovers and other activities to maintain crude production levels
 - Increase in total liquids production volumes and watercut at mature fields
 - Launch of electric submersible pump (ESP) rental program (over time, savings from pump purchases and ownership costs will offset rental expense)
 - Higher tariffs of natural monopolies and inflationary pressures, which were partially offset by cost optimization measures
- Upstream expenses at consolidated subsidiaries outside Russia increased 138.1% Y-o-Y due to production startups in Iraq (Badra) and Kurdistan
- Refining expenses at own refineries include expenditures for raw materials and supplies, maintenance and repairs of productive equipment, labor and electricity costs, and other similar costs
- Refining expenses at own refineries increased 13.4% Y-o-Y primarily due to:
 - Higher tariffs of natural monopolies
 - Higher expenditures for materials and supplies due to inflationary pressures
 - Higher expenditures related to pipeline transport of higher quality diesel
 - Increased ecologic program expenses
- Refining expenses at refineries of joint ventures increased 1.9% Y-o-Y due to higher expenditures for materials and supplies due to inflationary pressures and planned reconstruction of gasoline blending units at Yaroslavl refinery in 2Q 2014

- Refining expenses at refineries of joint ventures declined 8.8% Q-o-Q primarily due to 8.4% throughput reduction at Yaroslavl connected with planned repair of hydrocracking plant in April 2015
- Transportation expenses to refineries decreased 3.9% Y-o-Y due to lower throughput and increasing volumes covered by swap contracts
- Transportation expenses to refineries increased 2.9% Q-o-Q due to higher throughput
- Other operating expenses more than doubled due to increase in operating services provided by the Group to Messoyakha.

Selling, General and Administrative Expenses

Selling, general and administrative expenses include general business expenses, wages, salaries (except wages and salaries at our production and refining subsidiaries), insurance, banking commissions, legal fees, consulting and audit services, allowances for doubtful accounts, and other expenses.

- Selling, general and administrative expenses increased by 18.5% Y-o-Y, driven by:
 - Higher expenses at foreign subsidiaries due to weakening of Russian ruble
 - Consolidation of new entities (GPN-Shelf, GPN-Aero, etc.)
 - Growth in premium sales and business expansion.

Transportation Expenses

Transportation expenses include costs to transport crude oil and petroleum products to final customers. These costs consist of pipeline transportation, sea freight, railroad, shipping, handling, and other transportation costs.

- Transportation expenses increased 17.9% Y-o-Y due to higher tariffs of natural monopolies and weakening Russian ruble, which affected transportation costs for crude and oil product exports.

Depreciation, Depletion and Amortization

Depreciation, depletion and amortization expenses include depreciation of oil and gas properties, refining and other assets.

- Depreciation, depletion and amortization expenses increased 11.3% Y-o-Y in line with increase in depreciable assets driven by capital expenditure.

Taxes Other than Income Tax

2Q	1Q			6m		
2015	2015	Δ, %	(RUB million)	2015	2014	Δ, %
70,608	68,666	2.8	Mineral extraction taxes	139,274	122,245	13.9
17,752	15,989	11.0	Excise	33,741	40,247	(16.2)
3,176	2,334	36.1	Property tax	5,510	4,587	20.1
3,847	5,365	(28.3)	Other taxes	9,212	6,980	32.0
95,383	92,354	3.3	Total taxes other than income tax	187,737	174,059	7.9

- Taxes other than Income tax increased 7.9% Y-o-Y due to increase in mineral extraction taxes (13.9% Y-o-Y) due to negative impact of tax manoeuvre effective January 2015 and increased production at subsidiaries and proportionally consolidated companies, partly offset by 16.2% Y-o-Y reduction in excise tax expenses.

Share of Profit of Equity Accounted Investments

2Q	1Q			6m		
2015	2015	Δ, %	(RUB million)	2015	2014	Δ, %
4,876	3,316	47.0	Slavneft	8,192	5,694	43.9
4,131	2,625	57.4	SeverEnergiya (Arcticgas)	6,756	(2,005)	-
890	381	133.6	Nortgaz	1,271	-	-
721	325	121.8	Other companies	1,046	803	30.3
10,618	6,647	59.7	Share of profit of associates and joint ventures	17,265	4,492	284.3

- Share of Slavneft profit increased Y-o-Y and Q-o-Q due to foreign exchange gain in 2Q 2015, effect of revaluing debt portfolio primarily denominated in USD, and positive impact on operating profit in 6 months 2015 of tax manoeuvre effective January 2015
- Share of SeverEnergiya (Arcticgas) profit for 6 months 2015 increased due to start up of main SeverEnergiya (Arcticgas) fields.

Other gain

- Other income in 2Q 2015 and 6 months 2015 is primary due to writing off Company's RUB 16 billion share in liability at JSC Tomskneft.

Other Financial Items

- Foreign exchange gains/losses were mainly due to revaluation of portion of Group debt portfolio that is denominated in foreign currencies.

Liquidity and Capital Resources

Cash Flows

Marketing and distribution	5,059	3,380	49.7
Others	6,630	3,128	112.0
Subtotal capital expenditures	126,751	96,185	31.8
Change in advances issued and material used in capital expenditures	21,333	11,400	87.1
Total capital expenditures	148,084	107,585	37.6

- Capital expenditure for Exploration and Production increased 33.1% Y-o-Y due primarily to
 - Construction of major infrastructure for Novoport
 - Exploration expenses in Iraq and Kurdistan
 - Purchase of new licenses in Orenburg and Khanty-Mansiysk regions
 - Increased production drilling at Priobskoye
 - Capital expenditures at Prirazlomnoye field.

Debt and Liquidity

Main Macroeconomic Factors Affecting Results of Operations

The main factors affecting the Group's results of operations include:

- Changes in market prices of crude oil and petroleum products
- Changes in exchange rate between the Russian ruble and US dollar and inflation
- Taxation
- Changes in transportation tariffs for crude oil and petroleum products.

Changes in Market Prices of Crude Oil and Petroleum Products

Prices for crude oil and petroleum products on international and Russian markets are the primary factor affecting the Group's results of operations.

Petroleum products prices on international markets are primarily determined by world prices for crude oil, supply and demand of petroleum products, and competition in different markets. Petroleum product price trends on international markets in turn determine domestic prices. Price dynamics are different for different types of petroleum products.

The sharp drop in oil and oil products prices on international markets in US dollar terms since 2014 negatively affected Group results, but oil price declines were largely offset by changes in the exchange rate for the US dollar relative to the Russian ruble.

2Q 2015	1Q 2015	Δ, %		6m 2015	2014	Δ, %

Crude and oil products export duty rates

Resolution of the Russian Government # 276 (March 29, 2013) establishes a methodology for the Ministry of Economic Development of the Russian Federation to calculate export duty rates for crude oil and certain oil products.

Crude oil export customs duty rate

a) According to Russian Federal Law # 5003-1 (May 21, 1993) clause 3.1. subclause 4, amended by Russian Federal Law # 366-FZ (November 24, 2014) export custom duty rates should not exceed the marginal export duty rates calculated according to the following formulas:

Quoted Urals price (P), USD/ tonne	Maximum Export Custom Duty Rate
≤109.50	0%
109.50 < P ≤ 146.00	35.0% * (P – 109.50)
146.00 < P ≤ 182.50	12.78 + 45.0% * (P – 146.00)
>182.50	29.20 + 59.0% * (P – 182.50) for 2014
	29.20 + 42.0% * (P – 182.50) for 2015
	29.20 + 36.0% * (P – 182.50) for 2016
	29.20 + 30.0% * (P – 182.50) from 2017

Crude oil exports to those CIS countries that are Customs Union members (Kazakhstan, Belarus), are not subject to oil export duties.

b) Under Federal Law # 239-FZ (December 3, 2012) the Government of the Russian Federation established formulas for lower customs duty rates for crude oil that meets certain chemical and physical conditions, identified by the codes TN VED TS 2709 00 900 1 and 2709 00 900 3. According to Russian Government Resolution # 276 (March 29, 2013) these lower duty rates are calculated based on the average Urals price in the monitoring period using the following formula:

Quoted Urals price (P), USD/ tonne	Export duty rate
≤365	0
>365	45.0% * (P – 365)

Russian Federal Law # 366-FZ (November 24, 2014) and Resolution of the Russian Government # 1274 (November 29, 2014) amended the formulas described above. Under the new standards the reduced custom duty rates for specified crudes are calculated according to the following formula:

$$Ct = (P - 182.5) * K - 56.57 - 0.14 * P$$

Where P is the Urals price (USD/tonne) and K is an incremental coefficient equal to 42% for 2015, 36% for 2016, and 30% from 2017.

Resolution of the Russian Government # 846 (September 26, 2013) sets the rules for applying specific crude oil export duty rates and monitoring their use in respect of Group investment projects in Sakha Republic (Yakutia), Irkutsk Oblast, Krasnoyarsk Krai, and Yamalo-Nenets Autonomous Okrug north of Latitude 65°.

Order # 868 (December 3, 2013) of the Ministry of Energy establishes the application form and methodology to analyze the applicability of these special rates for crude oil.

c) Under Federal Law # 5003-1 (May 12, 1993) "Custom tariffs" crude oil produced from new offshore fields is exempted from export duties until:

- March 31, 2032 – for offshore fields located entirely in the Azov Sea, or located 50% or more in the Baltic Sea, Black Sea (at water depths less than 100 meters), Pechora Sea, White Sea, Sea of Okhotsk (south of 55° N), or the Caspian Sea
- March 31, 2042 – for offshore fields located 50% or more in the Black Sea (at depths exceeding 100 meters), Sea of Okhotsk (north of 55°), Barents Sea (south of 72°N)
- Indefinitely – for offshore fields situated 50% or more in the Kara Sea, Barents Sea (north of 72° N), or the Eastern Arctic (Laptev Sea, East Siberian Sea, Chukchi Sea, Bering Sea).

According to the Russian Federation Tax Code clause 11.1 subclause 5, a new offshore field is a field where commercial hydrocarbon production commences no earlier than 1 January 2016. The taxpayer may elect to designate any offshore field as a "new offshore field" provided no more than 1% of hydrocarbons (not including associated gas) have been produced from the field.

Export customs duty rate on petroleum products

In accordance with clause 3.1 of Russian Federal Law # 5003-1 (May 21, 1993) the export customs duty rate on petroleum products is determined by the Government. Petroleum products exported to those CIS countries that are Customs Union members (Kazakhstan, Belarus) are not subject to customs duties. From January 1, 2011 petroleum products exported to Kyrgyzstan are also not subject to customs duties. From November 13, 2013 exports of petroleum products to Tadzhikistan within the indicative limits are not subject to customs duties.

According to Resolution of the Russian Government # 276 (March 29, 2013) the export customs duty rate on petroleum products is calculated using the following formula:

$R = K * R_{\text{crude}}$, where R_{crude} is the export customs duty rate per tonne of crude oil and K is a coefficient depending on the type of petroleum product.

Under Resolution of the Russian Government #2 (January 3, 2014), the coefficient K is set at 0.65 for diesel fuel, 0.90 for gasoline and naphtha, and 0.66 for other oil products.

From 1 January 2015, in accordance with Federal Law # 366-FZ (November 24, 2014) and Resolution of the Russian Government #1274 (November 24, 2014), the coefficients K for different petroleum products are as follows:

	2015	2016	from 2017
Light and middle distillates			
Diesel	0.48	0.4	0.3
Lubricants oil			
Naphtha	0.85	0.71	0.55
Gasoline	0.78	0.61	0.3

Excise duties on petroleum products

In Russia, excise duties are paid by the producers of refined products. Excise duties are also applied to petroleum products imported into Russia.

Tax Code RF clause 193 established the following excise duty rates for petroleum products (in rubles/tonne):

	2014	2015	2016	2017
Gasoline				
Below Class 3	11 110	7 300	7 530	5 830
Class 3	10 725	7 300	7 530	5 830
Class 4	9 916	7 300	7 530	5 830
Class 5	6 450	5 530	7 530	5 830
Naphtha	11 252	11 300	10 500	9 700
Diesel fuel				
Below Class 3	6 446	3 450	4 150	3 950
Class 3	6 446	3 450	4 150	3 950
Class 4	5 427	3 450	4 150	3 950
Class 5	4 767	3 450	4 150	3 950
Heating oil	6 446	3 000	3 000	2 800
Motor oil	8 260	6 500	6 000	5 400

Mineral extraction tax (MET) on crude oil.

According to Tax code RF clause 342 (version Federal Law # 366-FZ November 24, 2014) the mineral extraction tax rate on crude oil (R) is calculated using the following general formula:

	2014	2015	2016	2017
MET oil - R	$493 * Kc * Kv * Kz * Kd * Kdv$	$766 * Kc - Dm$	$857 * Kc - Dm$	$919 * Kc - Dm$

$Dm = 530 * Kc * (1 - Kv * Kz * Kd * Kdv * Kkan)$, where

$Kmet = 530$ for 2015 FY, 559 starting from 2016 FY.

Kc reflects the volatility of crude oil prices on the global market. $Kc = (P - 15) * D / 261$, where P is average monthly Urals oil price on the Rotterdam and Mediterranean markets (in USD/bbl.) and D is the average ruble/ US dollar exchange rate.

Kv characterizes the degree of depletion of the specific field. It provides lower tax rates for highly depleted fields. Depletion is measured by N/V , where N is the cumulative production volume from the field and V is total initial reserves (ABC1 + C2 reserves volume at January 1, 2006). For fields with depletion between 0.8 and 1, $Kv = 3.8 - 3.5 * N / V$. Where depletion is greater than 1, Kv is 0.3. In all other cases $Kv = 1$.

Kz characterizes the relative size of the field (by reserves) and provides lower tax rates for small fields. For fields with initial reserves (designated by V_3 , defined as ABC1 + C2 reserves volume at January 1 of the year preceding the tax period) below 5 MMtonnes and depletion (N / V_3 where N is the cumulative production volume from the field) less than 0.05, $Kz = 0.125 * V_3 + 0.375$

Kd characterizes the effort required to recover oil. It varies between 0.2 and 1 depending on recovery complexity from the deposit as follows:

- 0.2 – for oil produced from deposits with permeability no greater than $2 * 10^{-3} \mu^2$ and effective formation thickness no greater than 10 meters

- 0.4 – for oil produced from deposits with permeability no greater than $2 \cdot 10^{-3} \mu^2$ and effective formation thickness greater than 10 meters
- 0.8 – for oil produced from deposits classified in the state mineral reserves balance as related to the Tyumen formation
- 1 – for oil produced from other deposits.

Kdv characterizes the degree of depletion of the deposit, providing lower tax rates for highly depleted deposits. Depletion is measured by Ndv/Vdv , where Ndv is cumulative production volume from the deposit and Vdv is total initial reserves (ABC1 + C2 reserves at January 1 of the year preceding the tax period). For deposits with depletion between 0.8 and 1, $Kdv = 3.8 - 3.5 \cdot Ndv / Vdv$. Where depletion is greater than 1, Kdv is 0.3. In all other cases $Kdv = 1$. For deposits containing hard-to-recover reserves the coefficient Kv is equal to 1.

Kkan characterizes the oil production region and oil quality. This coefficient provides lower tax rates for fields located partly or completely in regions with challenging climate and geological conditions (specifically, Yamal Peninsula in Yamalo-Nenets Autonomous Okrug, Irkutsk Oblast, and Sakha Republic (Yakutia)). Coefficient $Kkan$ is set at 0 until the first day of the month following the month when one of the following conditions is met:

- 1) Achieving maximum cumulative stipulated production from the field;
- 2) Expiration of the stipulated term.

When the tax exemption term expires $Kkan$ is equal to 1.

b) According to the Russian Federation Tax Code clause 342 subclause 2.1 and clause 338 subclause 6 the following ad valorem MET rates should be used for oil produced from new offshore fields (as a % of price):

- 30% from start of commercial hydrocarbon production until a five-year termination period, but not later than 31 March 2022 – for fields located entirely in the Sea of Azov or for fields located more than 50% in the Baltic Sea
- 15% from start of commercial hydrocarbon production until a seven-year termination period, but not later than 31 March 2032 – for fields located more than 50% in the Black Sea (at water depths less than 100 meters), the Sea of Japan, Pechora Sea, White Sea, Sea of Okhotsk (south of 55° N), Caspian Sea
- 10% from start of commercial hydrocarbon production until a ten-year termination period, but not later than 31 March 2037 – for fields located more than 50% in the Sea of Okhotsk (north of 55° N), Black Sea (at depths exceeding 100 meters), Barents Sea (south of 72° N)
- 5% from start of commercial hydrocarbon production until a 15-year termination period, but not later than 31 March 2042 – for fields located more than 50% in the Kara Sea, Barents Sea (north of 72° N), and eastern Arctic (Laptev Sea, East Siberian Sea, Chukchi Sea, Bering Sea).

Russian Federation tax law also provides for a zero rate of MET on oil produced from deposits classified in the state mineral reserves balance as related to the Bazhenov formation, provided all other Tax Code conditions are met.

Group effective MET rate

2Q 2015	1Q 2015	Δ , %		6m 2015	2014	Δ , %
7,072	6,873	2.9	Nominal crude oil MET rate, RUB/tonne	6,972	6,109	14.1
6,682	6,545	2.1	Effective crude oil MET rate, RUB/tonne	6,545	5,824	12.4
			Difference between nominal and effective rates, RUB/tonne	427	285	
390	328					

In 6 months 2015 the Group's effective MET rate was 6,545 RUB/tonne, or 427 RUB/tonne lower than the nominal MET rate established in Russian legislation. The difference results from the application of certain factors (Kv , Kz and Kd) that reduce the MET rate.

Mineral extraction tax (MET) on natural gas and gas condensate

Tax code RF clause 342 (version Federal Law # 366-FZ November 24, 2014) established mineral extraction tax rates for natural gas and gas condensate as follows:

	2014 (January - June)	2014 (July - December)	2015
MET on natural gas (RUB/mcm)	471* 700	35 * Eut * Kc	35 * Eut * Kc + Tg
MET on gas condensate (RUB/tonne)	647	42 * Eut * Kc	42 * Eut * Kc * Kkm

* The lower rate of MET applies to taxpayers that do not own the central gas transportation system and that are not more than 50% owned directly or indirectly by the owners of the central gas transportation system.

Eut is the base rate per fuel-equivalent unit calculated by the taxpayer depending on natural gas and gas condensate prices and their relative production amounts.

Kc characterizes the effort required to recover hydrocarbons from the particular deposit. The coefficient is designed to reduce the tax rate on natural gas and gas condensate and is equal to the lowest of the following concessionary coefficients: Kr – depending on location, Kvg – for highly depleted deposits, Kgz – for deposits at depths of more than 1,700 meters, Kas – for deposits related to the regional gas supply system and Korz – for deposits classified as Turonian formations.

Tg reflects gas transportation costs (set at zero for 2015 according to Federal Tariff Service of the Russian Federation).

Kkm is a correction coefficient that for 2015 is equal to 4.4.

Tax concessions

Under effective tax legislation Group subsidiaries apply the following tax concessions (including lower tax rates and coefficients that reduce the MET rate):

Tax concessions, applied during 6 m 2015	Subsidiaries (oil fields) belonging to the Group
MET for Oil	
Small fields factor Kz	OJSC Gazpromneft-Noyabrskneftegaz (Vorgentskoye, Vostochno-Vyngayakhinskoye, Severo-Karamovskoye, Valyntoyskoye, Yuzhno-Purpeyskoye)) LLC Zhivoy Istok (Baleykinskoye)
Depletion factor Kv	OJSC Gazpromneft-Noyabrskneftegaz (Pogranichnoye, Kholmogorskoye, Chatilkinskoye, Muravlenkovskoye, Sugmutskoye) LLC Gazpromneft-Vostok (Zapadno-Luginetskiy area, Shinginskoye) OJSC Yuzhuralneftegas (Kapitonovskoye)
Hard-to-recover factor Kd	OJSC Gazpromneft-Noyabrskneftegaz (Vyngayakhinskoye, Etu-Purovskoye, Zapadno-Noyabrskoye, Kraynee) LLC Archinskoye (Urmanskoye, Archinskoye) LLC Zapolyarneft (Vyngapurovskoye, Novogodnee) LLC Gazpromneft-Khantos (Priobskoye)
Oil production region and oil quality factor Knan	LLC Gazpromneft-Angara (Tympychikanskoye, Ignyalinskoye) LLC Novy-Port (Novoport)

<p>Zero MET rate for fields classified as belonging to Bazhenov formation Lower MET rate for new offshore fields in the Pechora Sea</p>	<p>LLC Gazpromneft-Khantos (Krasnoleninskoye) LLC Gazpromneft-Shelf (Prirazlomnoye)</p>
<p>MET for Gas</p> <p>Hard-to-recover factor Kc</p>	<p>LLC Novy Port (Novoport) CJSC Gazpromneft Orenburg (East part of Orenburg oilfield)</p>
<p>Profit tax</p> <p>16% rate (4% concession under regional legislation of Khanty–Mansiysk Autonomous Okrug)</p> <p>15.5% rate (4.5% concession under regional legislation of Yamalo-Nenets Autonomous Okrug)</p>	<p>LLC Gazpromneft-Khantos OJSC Gazpromneft-Noyabrskneftegaz OJSC Gazpromneft-Noyabrskneftegaz</p>
<p>Property tax</p> <p>Exemption from property tax for investment projects in Khanty–Mansiysk Autonomous Okrug applied before January 01, 2011 (under regional legislation of Khanty–Mansiysk Autonomous Okrug)</p> <p>1.1% rate on property purchased/constructed for investment projects in Yamalo-Nenets Autonomous Okrug (under regional legislation of Yamalo-Nenets Autonomous Okrug)</p> <p>Exemption from property tax for investment projects in Orenburg region (according to the Orenburg regional legislation)</p>	<p>LLC Gazpromneft-Khantos OJSC Gazpromneft-Noyabrskneftegaz LLC Zapolyarneft CJSC Gazpromneft Orenburg</p>

Transportation of Crude Oil and Petroleum Products

Transportation tariff policies are established by the state authorities to ensure a balance between the interests of the state and all participants in the transportation process. Transportation tariffs for natural monopolies are set by the Federal Tariff Service of the Russian Federation (FTS). Tariffs are dependent on transport destination, delivery volume, transportation distance, and several other factors. Changes in tariffs depend on inflation forecasts made by the Ministry of Economic Development of the Russian Federation, investment needs of the owners of transportation infrastructure, other macroeconomic factors, and compensation of economically reasonable expenses incurred by entities of natural monopolies. Tariffs are to be revised by FTS at least annually, and comprise a dispatch tariff, loading, transshipment, pumping, and other tariffs.

The following table shows average transportation costs per tonne for the Group's crude oil for export and use at its refineries, as well as costs per tonne for transportation of its petroleum products from refineries for export:

2Q	1Q			6m		
2015	2015	Δ, %	(RUB per tonne)	2015	2014	Δ, %
Crude oil						
Export						
1,574	1,846	(14.7)	Pipeline	1,709	1,702	0.4
CIS						
1,118	1,247	(10.3)	Pipeline	1,182	1,168	1.3
Transportation to Refineries						
402	487	(17.4)	ONPZ	444	514	(13.5)
1,047	1,187	(11.8)	MNPZ	1,117	1,024	9.0
1,139	914	24.6	YaNPZ	1,027	1,069	(3.9)
Petroleum products						
Export from ONPZ						
2,749	2,792	(1.6)	Gasoline	2,771	2,336	18.6
4,684	4,371	7.2	Fuel oil	4,528	3,986	13.6
4,500	3,876	16.1	Diesel fuel	4,190	3,302	26.9
Export from MNPZ						
1,885	1,916	(1.6)	Gasoline	1,901	1,643	15.7
2,787	1,947	43.1	Fuel oil	2,369	1,460	62.3
1,801	2,142	(15.9)	Diesel fuel	1,971	1,854	6.3
Export from YaNPZ						
1,389	1,387	0.1	Gasoline	1,388	1,133	22.5
1,809	1,843	(1.9)	Fuel oil	1,826	1,742	4.8
1,801	1,687	6.8	Diesel fuel	1,744	1,473	18.4

The Group's crude oil export route mix (tonnes) in 6 months 2015 and 6 months 2014 is presented below:

	6m	
	2015	2014
Crude oil exports		
Primorsk Baltic Sea port	5.5%	34.5%
Druzhba pipeline	15.4%	9.2%
Port of Novorossiysk	36.4%	21.9%
ESPO pipeline and the port of Kozmino	37.2%	34.4%
Exported without using Transneft system, including:	5.5%	0.0%
Prirazlomnoye	3.7%	0.0%
Novoport	1.8%	0.0%
Total	100.0%	100.0%
Crude oil exports to CIS countries		
Belarus	95.2%	100.0%
Uzbekistan	4.8%	0.0%
Total	100.0%	100.0%
